Education

UC Davis: Computer Science
(dropped out)

Skills

React, Node.js (JavaScript)
Sass, CSS-in-JS (CSS)
GIT, Regex
Figma, Sketch (Design)

TrustToken
UI Engineer
May 2019 – Nov 2019

Used React (JavaScript), Styled Components and Tachyons (CSS), and some NodeJS

Built internal tools for handling compliance work • performed user tests and user interviews to learn how they do their work • implemented an interface that was very different from what they had, but they loved how much more efficient they were with their work

Thumbtack
UI Engineer
Aug 2017 – Nov 2018

Used React (JavaScript), Sass (CSS), and some PHP

Worked on mostly customer-facing features: Messenger • booking negotiation • in-app notifications • helped build reusable components for the design system • ran A/B tests

Worked with PM, design, and collaborated with engineers across many different teams

Zetta
Lead UI Engineer
Mar 2015 – Apr 2017

Used React (JavaScript), Sass (CSS), and some PHP

Drove frontend architectural decisions • managed frontend build with Webpack and Gulp • wrote much of the app's UI • built an Electron app

Initiated and ran usability tests and user interviews • gathered frequent feedback from support

Ask Ziggy
UX / Software Engineer
Jul 2012 – Jun 2014

Wrote demo apps using Objective-C (iOS), Java (Android), JavaScript SPA (Web), C# (Windows)

Created prototype apps that integrated voice and gesture to help answer what the next generation of human-computer interaction looks like

UC Davis ITS Department
Team Lead / Web Developer
2011 – 2012

Team lead of the transportaion department website (this was a student role) • created a reusable custom Wordpress template that was later used by 4 other departments
